

Airports / Division Profile

ROBERT PECCIA & ASSOCIATES

Since 1979, Robert Peccia and Associates' airport engineers have provided services and designed improvements at nearly 100 general aviation and commercial services airports throughout Montana.

1) Facilities Development
Services we provide to airport clients include: acquisition of snow removal equipment and storage buildings, land acquisition, pavement surveys, site utilities, access roads, and airport fencing.

5) Project Management
Robert Peccia & Associates routinely provides all necessary project management services to complete a project from beginning to end. We focus on accurately completing the estimates, forms, applications, and documentation for the airport owner throughout the duration of the project.

6) RPA Pilots
Division Manager, Rick Donaldson, PE, completes pre-flight procedures during a pavement condition survey project for Montana's Aeronautics Division. Our three primary airport engineers are all licensed pilots. Besides giving us a pilot's perspective, it also aids with efficiency in performing projects or traveling to distant meetings.

2) Construction Management
Quality control is assured when our airport design team is involved in the construction process. We serve as the owner's representative to interpret plans and assure a quality project is constructed according to the client's plans and specifications.

3) Airport Design
Our airport design team is well versed in all aspects of general aviation airport improvements. From commercial airport improvements or smaller county airports, RPA is capable of handling all your airport's needs.

4) Airport Planning
Our Airports Division is experienced in providing complete planning services for airport development including: Master Plans, Site Selection Studies, Environmental Assessments, Site Surveys, and Airport Layout Plans. RPA has also completed 10 years of State Aviation System Plans for the Montana Aeronautics Division.

Airports / Division Profile

ROBERT PECCIA & ASSOCIATES

Since 1979, Robert Peccia and Associates' airport engineers have provided services and designed improvements at nearly 100 general aviation and commercial services airports throughout Montana.

If you have any questions regarding services we can provide, please contact the following individuals:

Rick Donaldson, PE
AIRPORTS DIVISION MANAGER

Bill Burkland, PE
AIRPORT DIVISION ASSISTANT
MANAGER

Keith Jensen, PE
PRESIDENT

Since 1979, Robert Peccia and Associates (RPA) has provided airport engineering services throughout Montana. We have experience at many general aviation airports across the State and also provide services to both non-primary and primary commercial service airports.

We excel at project management, which is key to the success in meeting deadlines, schedules, budgets and your expectations. We have prepared airside design projects on runways, taxiways, and aprons along with a complete range of airport master plans, detailed environmental documents, aviation system plans, and pavement condition surveys.

Upon completion of our designs, we have coordinated funding arrangements, administered construction contracts, and routinely represented the Owner's interests during construction activities.

Our personnel have a thorough understanding of the FAA's Federal Regulations and Advisory Circulars.

We are well acquainted with many of the federal and state officials, county commissioners, airport board members, and those active in aviation today.

Our primary airport engineers are private pilots, which gives them both an engineer's perspective and a pilot's perspective.

At RPA, we believe that technical competence, high-quality work, and timeliness in completing projects are the best ways to service our customers. Our many repeat clients testify to our competence and skills.

We stand committed to our clients. We care, and we maintain respect for traditional engineering principles. Our service is focused on technical excellence, with a commitment to tailor solutions to fit individual projects and problems.

REPRESENTATIVE PROJECTS

Bowman Field Improvements, AIP 01 thru 03
Baker Airport Improvements, AIP 01 & 02
Liberty County Airport Improvements, AIP 01 & 02
Cut Bank Airport Improvements, AIP 04 thru 06
Deer Lodge Airport Improvements, AIP 01 & 02
Dillon Airport Improvements, AIP 01 thru 06
Big-Sky Airport Improvements, AIP 01 thru 07
Fort Benton Airport Improvements, AIP 03
Gardiner Airport Master Plan, Site Selection & EA, AIP 01
Geraldine Airport Master Plan, Site Selection & EA, AIP 01
